THE DENTALISTS

Grandio® disc multicolor

permanent

For particularly aesthetic restorations, there is Grandio disc multicolor – the shade extension of the nano-ceramic hybrid material Grandio disc: The colouring of the Grandio disc multicolor makes the restoration look very vital, which is achieved with just three layers due to the material properties. The so-called Invisible Layer Technology imitates the natural colour gradient of the tooth from the incisal edge to the tooth neck.

The advantages at a glance:

- Highest filler content (86 % w/w)
- High aesthetic restorations
- Special composition of the material creates a colour gradient of the multicolour restoration like the natural tooth (Invisible Layer Technology)

Grandio® blocs & Grandio® disc

permanent

The nano-ceramic hybrid CAD/CAM materials Grandio blocs and Grandio disc are indicated for permanent single tooth restorations and set new standards with their extraordinary material strength. With 86 % filler content, they are the highest filled in their class.

Structur CAD

temporary

CAD/CAM Composite for temporary restorations

Looking for a long-term temporary, which delivers on its promises and can also be created quickly and easily? No problem for Structur CAD, the composite for CAD/CAM-produced temporary restorations. Structur CAD is a filled composite whose fillers ensure a high quality and thus a safe and reliable wearing period, in particular for long-term temporaries. As such, Structur CAD represents the latest generation of temporary restorations.

Blocks 5 x no. 40L

5 x no. 40L A1 REF 6076
 5 x no. 40L A2 REF 6077

Disc 1 x 20 mm (Ø 98 mm)

Disc A1 REF 6071
 Disc A2 REF 6072
 Disc A3 REF 6073

The advantages at a glance:

- **Fast and efficient**
CAD/CAM production of precision-fit temporary restorations
- **Highest quality and aesthetics**
for prolonged, safe wear – especially suitable for long-term provisional and semi-permanent restorations
- **Excellent edge stability**
- **Effortless** intraoral as well as extraoral **polishing** and individualisation
- No need to use an MMA primer

V-Print® Trusted Partners

VOCO cooperates with numerous renowned printer manufacturers. As part of the partnership, individual printer settings are determined for the V-Print resins. Ideal and reproducible printing results are the outcome of intensive cooperation. The current list with all V-Print compatible 3D printers can be found at www.voco.dental/3dprintingpartners.

CediTEC®

Aesthetic, precise, individual – these are the requirements that digitally fabricated full dentures are expected to fulfil. The digital planning and creation of dentures offers you many advantages. In addition to the time savings attained through a digital workflow, and the reproducibility of dentures when needed, the durability and aesthetics are especially interesting. You can create dentures completely in a CAD/CAM process using products of our portfolio that have been especially developed for the fabrication of dentures.

Set CediTEC Adhesive

1 × 80 g CediTEC Adhesive
1 × 4 ml bottle CediTEC Primer
+ accessories

REF 6082

The advantages at a glance:

- Flexible choice of denture base – 3D printed with V-Print dentbase or milled with CediTEC DB
- High-quality materials for long and high wearing comfort
- Individual dentures – reproducible at any time and customisable

Quick Up®

In many cases the hold of full dentures is unsatisfactory. The main reasons for this are bone atrophy, resorption processes and changes to the denture base, which is made up of both hard and soft tissue. Implants are very frequently used for fixing full dentures. This saves patient time, inconvenience and expense. The dentist is able to concentrate on the implantation and can make a removable connection with the implants simply by fitting the corresponding attachments or secondary components (female parts) to the existing denture. The Quick Up Set contains all the components required for attaching female parts, attachments and other attachment elements to composite-based dentures.

Luting of attachments and abutments in the prosthesis – without waiting time

The advantages at a glance:

- Very simple chairside use
- High strength values
- Complete set for immediate use, including checking and block out material for primary structures that require protection, e.g. implants
- Ideal combination of self-curing luting material and light-curing correction material
- Quick Up is gingiva coloured

Set QuickMix

- 1 x 7.5 g QuickMix syringe
- 1 x 5 ml QuickMix syringe Fit Test C & B
- 1 x 2 g Quick Up LC syringe
- 1 x 4 ml Adhesive bottle
- + accessories
