

CopraSupreme Hyperion

9 LAYERS OF TOSOH ZIRCONIA 600 - 1.100 MPa

A close-up photograph of a dental crown, specifically CopraSupreme Hyperion, resting on a dark, textured surface. The crown is surrounded by a large, iridescent soap bubble that reflects various colors of the rainbow. The crown itself has a distinct layered or crystalline texture, characteristic of the 9-layer zirconia construction mentioned in the text.

CopraSupreme Hyperion

16 VITA classic shades multilayer (A1 - D4)

CopraSupreme Hyperion ist ein multidimensionales, 9-schichtiges, hochtransluzentes Zirconiumoxid. Im Produktionsprozess werden 5 Schichten voreingefärbte Tosoh Zirconiumdioxid Pulver unterschiedlicher Biegefestigkeit ($\geq 600\text{-}1100 \text{ MPa}$) übereinander gelegt, wobei 4 Übergangsschichten gebildet werden. Das Resultat ist ein extrem natürlicher Farbverlauf für lebendige, ästhetische Restaurierungen für bis zu 14 Gliedern. Isostatisch gepresst, mit lebenslanger Garantie.

CopraSupreme Hyperion is a multidimensional, 9-layer, high translucent zirconia. In the production process, 5 different layers of pre-coloured Tosoh zirconia powders of different bending strength ($\geq 600\text{-}1100 \text{ MPa}$) are layered on top of each other, building 4 transition layers in the process. The result is an extremely natural colour transition for vivid, lively restorations for up to 14 units. **Isostatically pressed with a lifetime warranty.**
